DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, "at least one notch" must be shown or the feature canceled from the claims 1 and 9. No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 10-12, 14, 16-20, 21, 24-33 of U.S. Patent No. 6,669,391. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1, 10-12, 14, 16-20, 21, 24-33 of

Art Unit: 3751

the patent contain all limitations or more of claims 1-17 of the present application which describe a cleaning implement comprising a handle, a mop head, a liquid delivery system, and a disposable cleaning pad including at least one notch.

4. Claims 1-8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 4-9 of U.S. Patent No. 6,663,306. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1 and 4-9 of patent contain all limitations or more of claims 1-8 of the present application which a cleaning implement comprising a handle, a mop head, a liquid delivery system, and a disposable cleaning pad including at least one notch.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The FR-2575058 and Rader references show a cleaning element including a pad having a notch at the front and rear edges. The George, Buchanan and Roe et al references show a cleaning pad having a notch. The MacLeod, Mullinix et al, and Sims references show cleaning implements.
